

1979 10th Anniversary

\$32,000

400 4-Speed Special Edition

Mileage as of this date is original 9,786 Miles.

What is nicest about this car is that it drives, smells, looks, handles, and sounds just like it should in 1979 with about 10,000 miles on it.

What is the worst thing about this car? There is a small crack in passenger side seat leather that is not that noticeable but it just bugs me because I know that it is there.

What does this car need? Needs to be driven more. I think the radio needs some work as well.

The car was delivered new to Prestige Olds Pontiac in Sapulpa, Oklahoma from the GM Van Nuys plant in California.

The first owner of the car was a Michael Winebrenner.

Then the car went to the Volo Car Museum and Sales <http://volocars.com/>

Then Mr. Jurgen Stanley in North Carolina.

Then Canada.

This car is in "like new" condition and has less than 10,000 miles on it. You can check it out on the video and in the pics.
